# Pricing for Line Item Codes

Last Modified on 03/22/2023 2:50 pm EDT

> This guide provides information and links about setting pricing for line item codes. It is intended for general users.

## Line Item Code Pricing

Each line item code (LIC) typically has a default price set at the LIC record. You can also set up volume pricing on the LIC record. For more details:

## Rate Cards for Special Pricing

For more complex pricing schemes, you can use rate cards. These allow you to set up special pricing structures that can be attached to a single order or to every order from a specific customer. They also enable "scenario-based" pricing. For more details:
