

Troubleshooting DayBack Calendar Errors

Last Modified on 06/13/2022 12:56 pm EDT

This guide explains how to get support for software other than aACE. It is intended for all users.

Third-Party Software

The DayBack Calendar is software developed and distributed by another company. Upgrades from SeedCode are integrated during aACE maintenance updates.

Specific questions about configuring the DayBack Calendar or troubleshooting should be addressed to the company's customer support services. Access the [DayBack Calendar support site](https://dayback.com/support/) (<https://dayback.com/support/>) for documentation, introductory articles, or to contact their support team.
