

# aACE Data Interchange (ADI) Email Functionality

Last Modified on 07/29/2024 11:00 am EDT

## Expanded Capabilities Using the aACE Data Interchange

The aACE Data Interchange (ADI) is a set of data handshakes between an aACE system and external events. Email integration is the primary vehicle through which ADI works and [Mailgun integration](https://aace6.knowledgeowl.com/help/setting-up-mailgun) (https://aace6.knowledgeowl.com/help/setting-up-mailgun) is a pre-requisite.

Events and workflows enhanced by the aACE Data Interchange (ADI) include:

[Signature acknowledgements](https://aace6.knowledgeowl.com/help/vendor-acknowledgement) (https://aace6.knowledgeowl.com/help/vendor-acknowledgement) added to Purchase Order correspondence. (No need to email back a scanned print-out. Just click a button, enter a signature and date, then click another button. The new signed document is picked up by aACE and saved to the related record, and logs are entered all automatically.) **Get your Orders confirmed quicker and easier!**

A “[Pay Now](https://aace6.knowledgeowl.com/help/customer-pay-now-workflow)” (https://aace6.knowledgeowl.com/help/customer-pay-now-workflow) capability added to Invoice correspondence that allows a customer to immediately pay their bill via credit card (or ACH!). The email contains a link to a dedicated, secure payment processing site. Once completed, Receipts in aACE are auto generated and the authorization logged automatically. **Get paid faster and easier!**

For a more detailed demonstration of Email and ADI related capabilities, view our webinar on the subject at [ShowMe](https://showme.aacesoft.net/?id=10738) (https://showme.aacesoft.net/?id=10738).
