

Configuring and Accessing the Power BI Dashboard

Last Modified on 08/27/2026 12:25 am EDT

This guide explains configuring and using Power BI in aACE. It is intended for advanced users.

You can access Power BI in the aACE Main Menu by selecting Dashboard. In the Dashboard, select Analytics View.

When you access the Dashboard without configuring Power BI and aACE, aACE displays a message to enter a valid account link URL. Enter the correct Power BI URL, then select OK:

- If the aACE Software team is hosting the file, they will provide the URL.
- If your organization is hosting the file, in Power BI select Share, then Copy link.
